

Adventure[®]

INFLATABLE BOATS

We Are Adventure!

Adventure is a word that brings to mind excitement, discovery and thoughts of places still to visit ... good times with family and friends ... a gateway to fun, relaxation and pleasure. This has always been the vision of the Adventure Company, who, by bringing together the finest materials, design and technology have created the very best inflatable and RIB boats available. Boats that not only look good, but which perform faultlessly ... and go on performing, for year after year after year.

The Adventure range embraces tenders, solid decks, air-decks and RIB boats; whether you are a professional or commercial user, require a boat as a tender, need a boat for fishing or fun and relaxation ... or maybe wish to ski, and seek the high-speed thrills of a RIB, there is sure to be a boat which satisfies your requirements perfectly.

Welding Technology

Adventure's engineers have developed the original technology of thermal welding. Welding to obtain the ultra-high quality and standards of welding they desired and demanded, they designed and built welding equipments that would produce welded seams considered by critical experts to be amongst the strongest in the world, and the Company and its engineers are justifiably proud to have developed a process which ensures that every Adventure boat is of immense strength and practically indestructible; their process is the hallmark of the Company.

Indeed, the strength of every seam on an Adventure boat is three times stronger than the actual material itself, easily able to handle the sudden stresses that can develop when using a boat in difficult conditions, and unaffected by the effects of overheating in harsh, direct sunlight.

The engineers and designers constantly strive to further improve what is already the most advanced seam welding process obtainable. Other forms of this welding are being actively developed, unique to the Adventure Company. Adventure demands the ultimate strength from their boats. You should demand no less.

Adventure Infatable Boats ISO 6185

C Approved

Our Welding Seams

Welding is used to permanently bond all parts of the boat's structure. The result? A boat with seams and tubes that are virtually indestructible, and which will be as good as new many years after warranty has expired. All parts of the Adventure boat, once joined, remain that way permanently. No matter how severe the usage, no matter what the conditions, the utter reliability of an Adventure boat is guaranteed.

Full Complement Of Accessories

The finest boats require and deserve the finest accessories. Adventure's boats are highly specified, and are supplied with a very full complement of accessories. For instance, Adventure believes that every inflatable and RIB boat should be supplied as standard with full perimeter protection so every boat we manufacture is so equipped.

This costly moulding, applied around the entire outer perimeter of the boat, not only protects against scrubbing and abrasion; it also forces water downward when the boat is under way, thus helping ensure that an Adventure boat remains dry inside.

Best Materials For The Best Customers

Adventure design and build boats without compromise, ensuring absolute satisfaction from their users. The material used in all of their tenders, speedboats and RIBs is a premium-quality material which is not only extraordinarily tough; it is also perfectly at home in extremes of temperature and rough conditions. Virtually unaffected by ultra-violet light, fuels and oils, this German multi-layer material is perfectly suited to the construction technique employed exclusively by Adventure - the Thermowelding process.

Adventure Boats - Made For You!

No matter which Adventure boat you choose, the same painstaking care in design, development and construction, backed by on-going research into materials and technology, will guarantee the utter dependability and durability of your boat. Adventure's engineers and designers never rest to ensure that you can; enabling you to enjoy your boating experience with absolute confidence, and take advantage of carefree days on the water in a boat which is extraordinarily stable and safe, coupled with a high performance.

Boats of such excellence and specification might be expected to carry a premium price. All the more surprising, then, that these superlative boats are priced so very reasonably. Adventure boats your gateway to the finest boating available today ... and for many tomorrows.

V-650

The luxury V-650 RIB tender, designed for the toughest duty and high speed driving

V-650 has the great stability, excellent performance - ideal dual-purpose boat

Manoeuvrable, fast and extremely stable; absolute confidence in the strength of the hull at all times

Vesta *V-650

High speed, superb stability and outstanding manoeuvrability are hallmarks of this model. Beautifully built, incredibly tough, and ready to take you on your own adventures, the Vesta series can be relied upon to provide many years of supreme boating pleasure for friends and family. The strength of the fibreglass hulls, coupled to the security and safety provided by the inflatable tubes make this boat the perfect choice for cruises, water-skiing, fishing, diving or whatever you wish.

Material used: Mehler/Heytex 1200/1450 g/m²- grey, light grey, dark grey, black, red

PVC/PU fabrics are also available

Floor type: Fibreglass hull

V-650 - Standard equipment (see at Pict. 1, 2, 3):

- 1 - "V" moulded fibreglass hull with anti-slip deck surface
- 2 - Welded inflatable buoyancy tube with five hermetically-separated chambers
- 18 - Safety connector for cables
- 22 - Transom layer for outboard engine;
- 24 - Outboard protection, width 122 mm

V-650 - Optional equipment (see at Pict. 1, 2, 3):

- 3 - Stern seat for 3 person with soft backrest;
- 6 - Bow plate for mooring and anchoring
- 5 - Bow soft mattress; 14 - Box for accumulator
- 28 - Collapsible navigation stainless steel roll-bar, Italy
- 43-45 - Navigation lights: Signal white flag and two start navigation lights-mini mod
- 47 - Stainless steel safety handles
- 31 - Built-in fuel tank 187 l with fuel system and vent system
- 32 - Water tank 35 l with filling system
- 70 - Steering console V-650 with front soft seat for two person with soft backrest
- 80 - Super Lux driver seat with soft backrest and internal stowage
- 101 - Inflatable sundeck; 104 - Steering wheel with steering system
- 105 - Fuel gauge with indicator

V-345

Vesta RIB *V-250 *V-345

Vesta a series of Rigid Inflatable Boats designed and engineered to provide the full excitement and thrills of the open water. High speed, superb stability and outstanding manoeuvrability are hallmarks of all the boats in the Vesta series, from the V-250 through to the superbly appointed V-650 model.

The strength of the fibreglass hulls, coupled to the security and safety provided by the inflatable tubes make this series the perfect choice for a range of applications, whether as a small, tough luxury tender to larger craft or, with the larger boats, for water-skiing, fishing and diving. And, of course, for the simple pleasures of exploring the open waters, and coastline accessible only by boat.

Beautifully built, incredibly tough, and ready to take you on your own ad-

ventures, the Vesta series can be relied upon to provide many years of supreme boating pleasure for friends and family. High performance and utter dependability are built-in; excitement and the pleasure of freedom on the water come naturally.

The Vesta series has been designed for carefree, thrilling boating; you need only let your imagination decide where you wish to be, and your Vesta will take you there.

Material used: Valmex/Heytex 1000/1200/1450 g/m, color-dark grey, grey, light grey, red, black
PU fabrics are also vailable

Feel The Zest Of Life On The Water

We never lose sight of the fact that, faced with choice, our customers deserve only the very best products available. Adventure are committed to value, and, above all else, outstanding quality. The Travel 2 series of boats, with integral transoms, solid floors of marine ply located within precision aluminium extrusions, and inflatable keels, will meet and exceed the most exacting requirements. Our attention to detail ensures carefree boating, whether you are using your boat as a tender, or for fishing or diving. These boats exhibit impeccable handling and turning capabilities, coupled with great stability, thanks to their inflatable keels and very rigid floors. On rivers, lakes and the open sea, the care in design and manufacture of the boats inspires utter confidence.

T-300K - NEW from Adventure Boats - especially for the EU countries!

Material used: Valmex 1000 g/m2
Floor type: Rigid continuous floor of marine ply, located between precision aluminium extrusions

Standard equipment:

- Welded inflatable buoyancy tube of classic design, with two hermetically-separated chambers
- Inflatable keel providing correct V shape in hull
- Continuous 12 mm-thick marine-ply floor
- Precision anodised-aluminium extruded sections enabling perfect jointing of floor sections
- Extremely rugged integral transom for outboard motor with fitted plastic plate for mounting motor
- Full outboard protection guards against scuffing, and keeps inside of boat dry
- Drain plug in transom Safety grab-ropes on tubes Handle in nose also serves as towing ring
- Twin towing rings
- Twin rear moulded handles for lifting boat
- Two removable marine-ply seats, 15 mm thick, with positive, safe location
- Two oars with rowlocks, and twin tube-mounted oar supports
- Superb carrying and storage bag; (secondary bag for seats and floorboards fits inside main bag)
- Foot pump with valve adaptor
- Emergency repair kit in plastic container, including material and adhesive
- Operation manual
- Optional equipment:
 - Sun and wind-proof cabin-style cover providing protection for occupants against inclement weather
 - Transportation cover
 - Accessories bag with soft seat cover, locating on either of boats seats
 - Additional nose handle for lifting
 - Bravo-10, Foot-pump of double action

Arta *A-220 *A-240 *A-260 *A-280 *A-300 *A-330 The Harmony Of Lightness, Style And Superior Quality

The Arta series of inflatable boats represents a new generation of Adventure boats. The inflatable tube is designed in the "Italian style", whilst the inflatable floor and inflatable keel will meet all the demands of the most exacting owner. All of the usual advanced Adventure technical features have been retained, using the finest materials and accessories. New ideas have been utilized, too, resulting in the superlative Arta series of boats. It goes without saying that the lighter weight has been achieved despite the maintenance of our legendary high quality. Extreme manoeuvrability, lightness, easy handling, and the usual very high specification of standard accessories make the Arta series a joy to own.

Material used: Valmex 1000 g/m
Floor type: Inflatable air-deck
Floor material: Heytex 1800 g/m2

- Standard equipment:
- Modern unique high-technology Italian style welded inflatable buoyancy tube with three hermetically-separated chambers
- Inflatable keel providing correct "V" shape in hull
- Inflatable air-deck
- Extremely rugged integral transom for outboard motor with fitted plastic plate for mounting motor
- Full outboard protection guards against scuffing and keeps inside of boat dry
- Drain plug in transom
- Safety grab-ropes on tubes
- Handle in nose also serves as towing ring
- Twin towing rings
- Twin rear moulded handles for lifting boat
- Removable marine-ply seats, 20 mm thick, with positive, safe location; (A-220 and A-240 have single seat other Arta models have two seats)
- Two oars with rowlocks, and twin tube-mounted oar supports
- Lifting ring in nose of boat
- Superb carrying and storage bag

Master 1

M-330

A prestige, roomy tender for yachts and motorboats

Agile, maneuverable performance with easy handling

An Adventure boat guarantees those unforgettable good times on the water

Adventure's advanced technology ensures trouble-free, care-free boating

Master 1 *M-220 *M-240* M-260 *M-280 *M-300 *M-330 When We Are Talking About Prestige...

In keeping with our determination to provide our clients with the most modern developments and advanced technology, we have developed our new luxury series of boats ... a new generation ... the Master 1 series. With tubes executed in the "Italian style", the Master 1 series is a new innovation for Adventure; the technical merits, workmanship and design have exceeded our already high expectations. The continuous solid floor of marine ply, with precision anodised-aluminium extrusions ensuring perfect location, resulting in an extremely rigid floor ... the inflatable keel ... increased tube diameter, with three separate hermetically-separated compartments, even on the 2.2 metre boats, is our designers' vision become reality. The range of sizes available in this series, from 2.2 to 3.3 metres, ensures a model for every purpose; but above all your Master 1 series boat will, as with all Adventure boats, always represent the height of safety and reliability on the water, and keep you on the crest of a wave.

Material used: Valmex 1000 g/m

Floor type: Rigid continuous floor of marine ply, located between precision aluminium extrusions

Standard equipment:

- Uniquely-constructed welded inflatable buoyancy tube in Italian style, with three hermetically-separated chambers
- Inflatable keel providing correct 'V' shape in hull
- Continuous 12 mm-thick marine-ply floor
- Precision anodised-aluminium extruded sections enabling perfect jointing of floor sections
- Extremely rugged integral transom for outboard motor with plastic fitted plate for mounting motor
- Full outboard protection guards against scuffing, and keeps inside of boat dry
- Drain plug in transom
- Safety grab-ropes on tubes
- Handle in nose also serves as towing ring
- Twin towing rings
- Twin rear moulded handles for lifting boat
- Removable marine-ply seats, 20 mm thick, with strong, secure location system; (M-220 and M-240 have single

seat; other models have two seats)

- Two oars with rowlocks, and twin tube-mounted oar supports
- Bow lifting ring
- Superb storage bag contains further bag containing seat(s) and floorboards
- Foot-pump with valve adaptor
- Emergency repair kit in plastic container, including material and adhesive
- Operation manual
- Optional equipment:
- Transportation cover
- Accessories bag with soft-seat cover, locating on either of boat's seats
- Detachable soft-seat cover
- Accessory bag to fit in nose of boat (for the models M-280, M-300, M-330)
- Bravo-10, Foot-pump of double action

Master 2

M-360

The M-360 is a fast, large boat the inflatable keel allows effortless planing and superb turning characteristics

Master 2 series boats provide roomy accommodation for passengers and are ideal, comfortable family boats

The large size and superlative stability make them ideal for fishermen and divers, together with their equipment

Fast, and utterly dependable boating - four models to suit every requirement

Master 2 *M-360B *M-360 *M-400 *M-440 *M-470 *For Those Who Want

The Master 2 series has proved itself over many years as a master of the seas ... these large boats, with their inflatable keels, extremely rigid continuous marine-ply floors located between precision anodised-aluminium sections, ensuring perfect location, are representative of the immense pride and care we invest in these, and all other, Adventure boats. The Master 2 series of boats have an unsurpassed combination of classic design; the large tubes, massive carrying capacity, speed capabilities coupled with phenomenal stability, and extreme long-life expectancy in the most difficult and demanding conditions are a tribute to our design team. These boats have demonstrated time and again their ability to operate without effort even when highly loaded, even in heavy seas. As with all Adventure boats, the welded tubes easily deal with high temperatures. Despite their large size, these boats really perform; they can handle high engine powers with ease. For extra convenience, they feature an accessory bag in the boat's nose, which is removable, and made from water-repelling fabric. Any Master 2 series boat is a worthy choice; a hard-working, incredibly rugged boat which will delight not only the amateur user but professionals, too. These boats make you the Master of the seas!

Material used: 1200 g/m2 (for the models M-440, M-470)
Floor type: Rigid continuous floor of marine ply, located between precision aluminium extrusions

- Standard equipment:

 - Welded inflatable buoyancy tube of classic design, with 3 hermetically-separated chambers (4 for M-470)
 - Inflatable keel providing correct V' shape in hull
 - Continuous 12 mm-thick marine-ply floor
 - Precision anodised-aluminium extruded sections enabling perfect jointing of floor sections
 - Extremely rugged integral transom for outboard motor with fitted plastic plate for mounting motor
 - Professional English valves "Leaffield", 4 Pcs.
 - Full outboard protection guards against scuffing, and keeps inside of boat dry
 - Drain plug in transom
 - Safety grab-ropes on tubes
 - Handle in nose also serves as towing ring
 - Twin towing rings
 - Four rear moulded handles for lifting boat (2 for M-360)
- Three removable marine-ply seats, 20 mm thick, with positive, safe location (two for M-360)
 - 2 oars with rowlocks, and twin tube-mounted oar supports
 - Detachable accessories bag to install in boat's nose
 - Superb carrying and storage bag; (secondary bag for seats and floorboards fits inside main bag)
 - Professional foot pump with valve adapto
 - Emergency repair kit in plastic container, including material and adhesive
 - Operation manual

Optional equipment:

Rubikon

R-440

Perfectly suited to the most difficult duties and conditions

Uniquely-engineered hull configuration ensures total stability, and ultimate in seaworthiness and performance

Safe, stable operation under all conditions even when used with an 80 HP 4-stroke outboard motor. No comments!

The R-495 hight currying capacity

Adaptable for any mission, any task - no matter how arduous

Special fabric makes easy to blend with the surroundings when necessary

Rubikon *R-440 *R-470 *R-495

*For every professional need - and even more

When a boat is required for the most difficult of conditions, and where utter and total reliability is the priority, the Rubikon series of boats is without comparison. The phenomenal strength of the welded seams, ensuring joints three times stronger than the material itself, is the user's guarantee of absolute dependability and freedom from problems. No matter whether you are a Professional, Commercial or Military user, or otherwise require a boat that can absorb terrific punishment and still deliver the sort of performance that you demand, the Rubikon will do whatever is required of it ... with ease. The Rubikon is versatile, too ... available in open format, or with jockey or vertical console, and all easily customised by the user to their own specification. When your requirements demand the toughest, most reliable boat for the toughest of jobs, Rubikon boats are already proving to their operators that they can be relied upon to deliver whatever is required of them ... consistently ... and with utter dependability. Each boat is equipped with foot-pum of double action, Bravo-10.

Material used: Valmex 1450 g/m, color - dark grey; Heytex 1200 g/m2, color - light grey, red; PU fabrics are also available

Floor type: Rigid continuous floor of marine ply, located between precision aluminium extrusions

The classic Rubikon R-495 with forward-located 'N-frame'. This demonstrates the boats great versatility for users' requirements

The classic Rubikon R-495 with SPORT-1 steering console

Forward view of R-470 Lux, showing deep 'V' formed in boat's hull by inflatable keel. This assures superlative handling and planing capabilities

Standart equipment photo report:

*Note: See all available optional equipment in "Accessories"

Stainless steel drain plug. Lower transom side is protected by

rear floorboard location heavy-duty reliable fasteners for

through aperture in floor drain plug showing stainless steel cap

protection for extreme durability The inflatable keel has extra

Reinforced transom attachment provides phenomenal strength

Extremely strong handles on tubes for lifting and handling

Lifting rings are reinforced and have phenomenal strength

Valve assembly protected from ingress of dirt and detritus by

Reliable, convenient attachment utilizing fabric with easy but secure attachment and removal

Bow handle in stainless-steel with combined towing-ring. The inflatable keel has extra protection

Lower area on tube is equipped with double outboard protection. The side towing ring is especially reinforced for total reliability

Floorboard sections are made from marine ply, of 15 mm thickness, reinforced with two longitudinal aluminium extrusions

Floor sections fit together with accuracy and simplicity

Each hermetic section of the inflatable tube is equipped with professional-series valves Leafield, (main inlet valve and overpressure valve)

Marine-ply transom, 40 mm thick, is protected by a stainless-steel plate. Lifting holes on the transom are reinforced by stainless-steel tubes

Perimeter is protected double outboard protection, which pushes water downward and away. Bow of boat has four lines of protection
